

**Construction NOTICE**  
**Update**

***Valley View Bridge Replacement  
In Washington County***

**JUNE 16, 2010**

Construction activities continue on the roadway and a new Valley View Bridge over the Santa Clara River. This project is funded through the Federal Government Economic Recovery Stimulus Project Grant. The project consists of grading, drainage, riprap in the river channel, sidewalks, driveways, highway lighting system and resurface the pavement in the project area.

**Project Schedule**

The project is scheduled to be completed by July 30, 2010. Construction crews are working on the Phase 2 Section of the new bridge structure. Forming of the new deck and end walls continue with placement of concrete in the bridge deck scheduled for Tuesday night June 29, 2010. This night placement is required due to the hot day time temperatures. Crews will be working regular shifts Monday through Saturday between the hours of 6:00 a.m. and 10:00 p.m. until the project is completed.

**Traffic Control**

*Due to the placement of the deck concrete on Tuesday June 29, 2010, Valley View Road will be closed to all traffic until Tuesday July 6, 2010 to allow for proper curing of the new deck. An alternate detour route will be marked for travel around the closed bridge construction area. Please use this detour.*

This is a heavy construction zone and we would recommend that alternative routes be used during construction to avoid construction activities and delays. We will maintain property access at all times, when possible.

We apologize for any inconvenience this construction may cause. If you have any questions or concerns regarding this project, please contact Tom Reece, Public Information Specialist Wadsworth Brothers Construction Co. at our toll free number 1-(877) 893-9336. If no answer, leave a message and Tom will return the call as soon as possible. If you wish to subscribe to updated construction notices, send an email to [tom@wadsbro.com](mailto:tom@wadsbro.com).

*We appreciate your cooperation and patience during this construction!*
