Barry Barnum, Water Services Director, (435) 703-0994
Marc Mortensen, Assistant to the City Manager, (435) 703-0953

ST. GEORGE RELEASES ANNUAL WATER QUALITY REPORT FOR 2008

St. George residents can expect to receive their copy of the City's 2008 Water Quality Report in their mailboxes sometime this week. The brochure includes laboratory test results from drinking water quality analyses that were completed in 2008. It also includes information on the sources of our drinking water and the plans that are in place to protect the sources.

The water quality information is distributed in accordance with State and Federal requirements to all patrons in the St. George water service area. Additional copies are also available to community organizations, large private employers, and public agencies, who are encouraged to post the information in public places such as schools, libraries, and the cafeterias or lunch rooms of public buildings. Anyone who would like additional copies of the report should contact Shari McTiver, Water Services Engineer of the St. George Water Department at (435) 627-4858.

A copy of the water quality data table is included below:
